SWETHA KOMMARAJU

Senior Data Analyst | Power BI & Microsoft Fabric Developer | Azure Data Engineer

(737) 212-4267 | swethakommaraju23@gmail.com | LinkedIn | Portfolio | GitHub

Microsoft Certified: Power BI Data Analyst Associate (PL-300)

PROFESSIONAL SUMMARY

Microsoft-certified Data Analyst and Data Engineer with 6+ years of experience turning raw enterprise data into dashboards, pipelines and automated reporting that leadership acts on. Builds end-to-end solutions across **Power BI, Microsoft Fabric, Azure Data Factory, Databricks, SQL Server, PostgreSQL, SSRS, SSIS and SSAS**, and extends them with **Power Apps, Power Automate and Copilot / Azure OpenAI**. Track record of measurable impact: **15% better sales forecast accuracy, 40% lower reporting latency, 30% faster report loads and 99.9% uptime** on mission-critical batch jobs. Domain experience in multifamily real estate, Fortune 1 retail (Walmart) and wholesale distribution.

TECHNICAL SKILLS

- **BI & Reporting:** Power BI (DAX, Power Query/M, Row-Level Security, Paginated Reports, Deployment Pipelines, Semantic Models), SSRS, Tableau Desktop & Prep, Excel (Power Pivot, Power Query, Pivot Tables)
- **Microsoft Fabric:** Lakehouse, Data Warehouse, Dataflows Gen2, Data Pipelines, Notebooks, OneLake, Direct Lake, Real-Time Intelligence
- **ETL & Data Integration:** SSIS, Azure Data Factory, Azure Synapse, Dataflows, Incremental Loads, Change Data Capture
- **Power Platform:** Power Apps (Canvas & Model-Driven), Power Automate (Cloud & Scheduled Flows, Approvals, Report Distribution), Dataverse
- **AI & Analytics:** Copilot for Power BI & Fabric, Fabric Data Agents, Azure OpenAI, Prompt Engineering, AI Visuals (Key Influencers, Decomposition Tree, Smart Narratives, Q&A), Forecasting & Predictive Modeling, scikit-learn, AI Builder
- **Cloud & Big Data:** Azure Databricks, Azure Data Lake Storage Gen2, PySpark, Spark SQL, Hive, HDFS, Delta Lake
- **Databases & Modeling:** SQL Server, T-SQL, PostgreSQL, Snowflake, Teradata, SSAS (Tabular & Multidimensional), Star & Snowflake Schema, Dimensional Modeling
- **Programming:** SQL, Python (Pandas, NumPy, Matplotlib), PySpark, JavaScript, HTML/CSS, React, Angular, Node.js
- **Practices:** Data Governance, Data Quality, Performance Tuning, Git/GitHub, Azure DevOps, Agile/Scrum, Requirements Gathering

PROFESSIONAL EXPERIENCE

Data Analyst | Hillpointe **Mar 2025 – Present**

Multifamily real estate investment and development firm

- Built 15+ interactive Power BI dashboards on occupancy, leasing velocity, rent growth, revenue and delinquency, giving leadership a single view of portfolio performance across properties.
- Designed Azure Data Factory and SQL Server ETL pipelines for near real-time ingestion and transformation, cutting reporting latency by 40%.
- Migrated reporting workloads to Microsoft Fabric (Lakehouse, Dataflows Gen2, Direct Lake semantic models), improving data accessibility and refresh scalability.
- Developed and maintained SSRS paginated reports and SSIS packages for monthly financial close and operational reporting, with automated subscriptions to stakeholders.
- Automated report distribution, data-refresh alerts and approval workflows with Power Automate, and built a Power Apps asset-tracking app for property lifecycle monitoring, removing manual spreadsheet updates.
- Enabled Copilot in Power BI and Fabric and configured AI visuals (Key Influencers, Smart Narratives, Q&A) so business users can ask questions in plain English.
- Implemented row-level security, data validation rules and governance standards with cross-functional teams to keep KPIs consistent across all reporting platforms.

Environment: *Power BI*, *Microsoft Fabric*, *SSRS*, *SSIS*, *SQL Server*, *Azure Data Factory*, *Power Apps*, *Power Automate*, *Copilot*, *Excel*

Data Engineer | Miracle Software Systems Inc. **Aug 2019 – Nov 2022**

Client: Walmart — *global retail leader processing high-volume transactional data*

- Built and managed Azure Databricks clusters and notebooks for scalable PySpark processing of large retail datasets.
- Designed and automated ingestion and transformation pipelines in PySpark and Hive, speeding up delivery of curated data to analytics teams.
- Analyzed high-volume sales and inventory data with Hive, HDFS and PySpark to produce insights for retail BI use cases.

- Monitored and scheduled mission-critical financial batch jobs in Automic, sustaining 99.9% uptime and meeting strict SLAs.
- Installed, configured, tuned and documented Hadoop ecosystem components.
- Partnered with analytics and business teams to guarantee reliable data for downstream ThoughtSpot and Teradata reporting.

Environment: *Azure Databricks*, *PySpark*, *Hive*, *HDFS*, *Automic*, *Teradata*, *ThoughtSpot*

Client: American Tire Distributors — *leading North American tire wholesaler and distributor*

- Implemented predictive forecasting models in Power BI, improving sales forecast accuracy by 15%.
- Tuned complex SQL queries, stored procedures and views, reducing report load times by 30%.
- Built and optimized SSIS ETL packages and SSAS cubes supporting enterprise BI for sales and operations.
- Designed parameterized, matrix and tabular reports in SSRS and Power BI for sales and operations leaders.
- Translated business requirements into scalable reporting solutions and closed BI enhancement tickets on time.

Environment: *Power BI*, *SSRS*, *SSIS*, *SSAS*, *SQL Server*, *Snowflake*

CERTIFICATIONS

- Microsoft Certified: Power BI Data Analyst Associate (PL-300)
- Alteryx Designer Core Certified

EDUCATION

Master of Science in Computer Science — Wichita State University, Wichita, KS **Dec 2024**

Bachelor of Technology in Information Technology — JNTU Kakinada, India **May 2019**
